SCHOOL SUBJECTS

● **School subjects om English:**

Electronics / Electrical measurement / Serbian language / English language / PE / Mathematics / Physics / Programming / Fundamentals of electrical engineering / Web Design / Practical classes / Orthodox religion

HOBBIES AND INTERESTS

● **My interests and hobbies**

Since my childhood, I was keen on the sport. I used to play basketball for a long time. While I was training basketball, I won many tournaments, made many friendships, and had an opportunity to live a healthy life. During elementary school, I got another big passion which is programming. The first time I was able to learn something about programming was in our Informatic class. We learned QBasic as an introduction to the programming world. I found programming amusing in many ways. As a result of my passion for programming, I decided to attend a course to learn more and improve myself as much as I could. Now I'm learning C++. I'm curious about it. Besides basketball and programming, cars are my interest. In the end, I would like to say that my goal is to grow into a programmer, especially in the car industry. Also, I would like to say that I took part in the physics and mathematics competition.
