Programming | Web Design | Video Games

ADDITIONAL INFORMATION

SCHOOL SUBJECTS

School subjects on English:

Electronics / Electrical measurement / Serbian language / English language / PE / Mathematics / Physics /
Programming / Fundamentals of electrical engineering / Web Design / Practical classes / Orthodox religion

HOBBIES AND INTERESTS

My hobbies Computer programming and going to the gym are both excellent hobbies to have in my opinion.

Computer programming can be a challenging and rewarding hobby and job. By writing code, you can create useful and interesting applications and websites. It's also a valuable skill in today's job market, and learning how to code can open up many career opportunities.

On the other hand, going to the gym is a great way to stay active and healthy. Regular exercise can help improve your physical and mental well-being, and going to the gym can be a great way to socialise and meet new people. Whether you enjoy weightlifting, cardio, or a combination of both, there are many benefits to be gained from regular gym attendance.

Both of these hobbies complement each other well. By being physically active, you can stay healthy and improve your focus and mental clarity, which can be helpful when working on complex programming projects. And, by regularly practicing programming, you can strengthen your problem-solving skills and boost your creativity, which can be applied to other areas of your life as well.
